Possible restriction
It is designed for specific CMS platforms like Moodle, WordPress, and Drupal.

Technical difficulty (skills needed): ⭐ ⭐ ⭐

Environmental Impact

The tool mentioned has a low environmental impact

H5P is a web-based tool, which means that it does not require users to install any software locally on their computer, reducing the amount of energy and resources required for installation and maintenance. However, the environmental impact of using H5P will depend on how it is being used and hosted.

Is it inclusive?

H5P provides a wide range of interactive content types that can be customised to meet the needs of learners with special learning difficulties. It can be used for creation such materials as: customised audio and video content, interactive exercises, accessible designs, etc.
