

# CUSTOMISABLE WEBSITES

## The tool

---

WordPress is a popular open-source content management system (CMS) used for creating and managing websites, blogs, and online stores. It is user-friendly and customizable, accessible to users with little or no technical knowledge. It allows to create and manage website content through a visual editor and provides access to a wide range of themes, plugins, and widgets that can be used to customize the website's appearance and functionality.

## Description

---

### Material required

A computer or mobile device with an internet connection and a web browser. To start your own website, you will also need a domain name and web hosting service.

### Investment required

WordPress itself is a free and open-source system, so there are no direct costs associated with using it, except for domain and hosting.

### Possible uses

To be used by anyone and for any type of website.

### Possible restriction

Security awareness and at least basic technical skills are advisable.

**Technical difficulty (skills needed):** ★ ★

## Environmental Impact

### The tool mentioned has a low environmental impact

The environmental impact related to WordPress usage can vary depending on how it is hosted and maintained, especially what kind of hosting are you going to use, what plugins and themes are installed and how you manage website maintenance and updates.

### Is it inclusive?

WordPress itself is not specifically designed for people with SLDs, however, there are a number of features and tools that can help make it more accessible. WordPress is compatible with screen readers, you can also find appropriate accessibility-ready themes and plugins which can make the website even more inclusive.
